

*"The Clinical Advantage"™*

# ANOTHER REASON TO CHOOSE BIODEX

## Balance System SD, BioSway and Gait Trainer 3

now with **G-Codes**

# What if we could help you spend more time with patients, less time on paperwork and assure fewer reimbursement denials from Medicare?

Biodex has done just that by incorporating Automated G-code Calculation and Impairment Level Reporting into the software programs of the Balance System™ SD, portable BioSway™ and Gait Trainer™ 3.

### Prove Need, Progress and Outcome

Enhanced objective reporting includes impairment percent with associated modifier code, functional limitation G-code categories, and patient status (current and discharge) – important for Medicare reimbursement and fostering continuity of care.

- Increase efficiency and productivity through use of automated G-code and Impairment Level Reporting
- Improve documentation of rehab effectiveness
- Objective measures manage patients efficiently and effectively
- Enhances objectivity, repeatability and reliability of functional limitation reporting
- Justifies clinical decision making

*BioSway™  
(shown with optional printer and stand)*

*Gait Trainer™ 3*

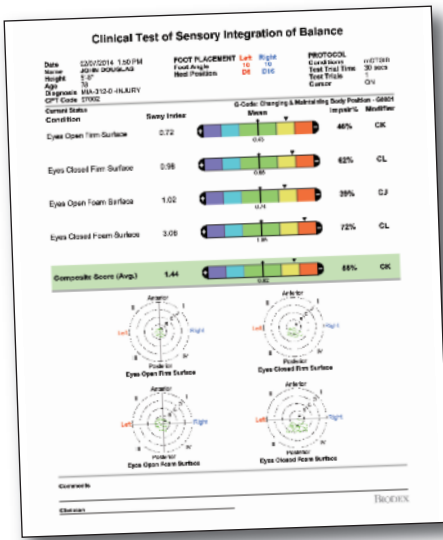

*Balance System™ SD*

# ENHANCED PRODUCT SOFTWARE FROM BIODEX\*\*

## Enhanced reporting includes:

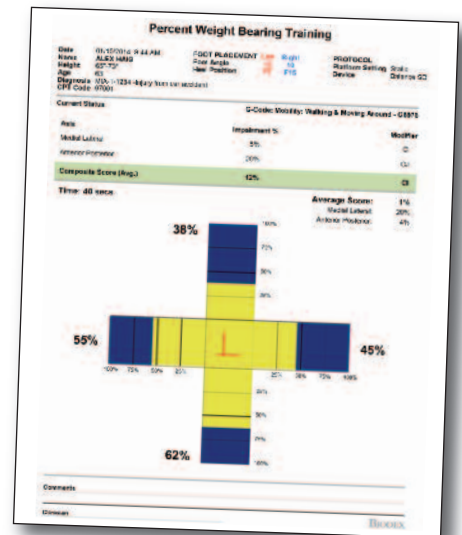

- Impairment percent with associated modifier code
- Functional Limitation G-code categories
- Patient Status: (Current and Discharge Status)

## Balance System and BioSway Sample G-Code Reports

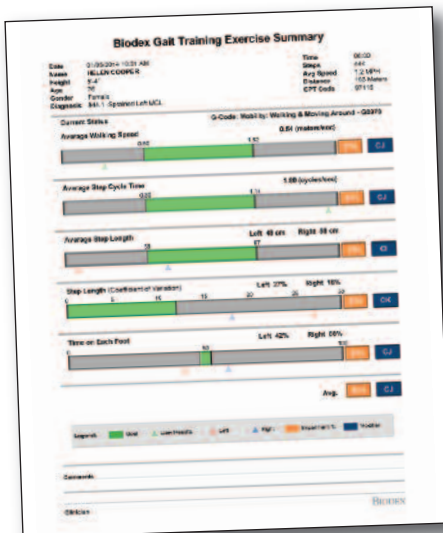

CTSIB reporting\* - Provides G-code modifier and impairment percent for the three sensory systems that contribute to balance:

- Visual
- Proprioception
- Vestibular

Percent Weight Bearing\* - Documents G-code modifier and impairment level based on patient's weight bearing targets.

## Gait Trainer 3 Sample G-Code Report

Training Exercise Summary\* - Document step length, step symmetry, and step cycle time with associated impairment percent and modifier for these important gait measurements.

\*Clinician can use "clinical judgment" and amend impairment %. Impairment modifier will change accordingly.

\*\*Free software upgrade will be available for devices with 12" display. New hardware is required for existing devices without a 12" display. Call for details.
