Nuclear Medicine

Service Plans

Depend on the Biodex Service Plan

1. As the manufacturer, Biodex has direct access to all parts; your service is performed by the same trained professionals who built your equipment
2. Preferred Customer Response Time
3. Replacement Protection
4. No return shipping fees incurred for repaired item
5. Special pricing offered for parts not covered under Service Plan
6. Highest level of support at reasonable prices
7. PEACE OF MIND

We designed and built your system

Biodex prides itself on providing state-of-the-art technology to address the technical, regulatory and administrative needs of your Nuclear Medicine Department. However, like any intricate piece of equipment it will not function flawlessly forever... wear and tear is inevitable in even the highest quality product.

You put your trust in Biodex when you purchased the equipment, and the warranty was an integral part of your decision. Now that your warranty is expiring or about to expire, you can count on Biodex again to help protect your investment for years to come. Insurance is a part of life and we strongly suggest that you do not leave yourself unprotected.

Take advantage of this opportunity to extend your product warranty by purchasing a Biodex Service Plan today.

Our best future customer is a satisfied current customer...

It is in our best interest to keep you happy while we keep your equipment running. After all, we want you to buy your next nuclear medicine product from us! That's why we've added value to our Service Plan. By including various discounts and other benefits, this gives you a greater return on your service investment – *even when nothing breaks!*

*Prices reflect annual rates.
Applies to United States only.*
